

**Proposed Finding of No Significant Impact**  
Septage Treatment System Improvements for the La Jolla Band of Luiseño Indians  
La Jolla Indian Reservation, San Diego County, CA

The U.S. Environmental Protection Agency (EPA) is considering authorizing approximately \$300,000 in grant funds to the La Jolla Band of Luiseño Indians for the proposed construction of a larger and more advanced septage treatment facility to replace an existing unlined septage pond (evaporation pond) that treats septic tank and portable toilet septage.

EPA has determined that the project will not have significant and unmitigated environmental impacts and proposes to issue a Finding of No Significant Impact (FNSI) instead of an Environmental Impact Statement. The EA is also available for public inspection at the EPA Region 9 office at 75 Hawthorne Street, San Francisco, CA. To make an appointment to review the EA at this office or to obtain additional information about the project, please contact Linda Reeves at (415) 972-3445 or [reeves.linda@epa.gov](mailto:reeves.linda@epa.gov). A copy of the EA are also available for public review at the La Jolla Environmental Office, 22000 Highway 76, Pauma Valley, CA, between the hours of 8:30am and 4:30pm Monday through Friday. Comments on the FNSI must be submitted to EPA by August 18, 2006. No administrative action will be taken by EPA on this project during the comment period.
